Patient Care Provider Domain:

Collect information to identify a patient’s medication-related problems and health-related needs.

Example Supporting Tasks:
- Collect a medical history from a patient or caregiver.
- Collect a medication history from a patient or caregiver.
- Discuss a patient’s experience with medication.
- Determine a patient’s medication adherence.
- Use health records to determine a patient’s health-related needs relevant to setting of care and the purpose of the encounter.

Analyze information to determine the effects of medication therapy, identify medication-related problems, and prioritize health-related needs.

Example Supporting Tasks:
- Assess a patient’s signs and symptoms to determine whether the patient can be treated within the scope of practice or requires a referral.
- Measure an adult patient’s vital signs and interpret the results (e.g., body temperature, pulse rate, respiration rate, and blood pressure).
- Interpret laboratory test results.
- Identify drug interactions.
- Perform a comprehensive medication review (CMR) for a patient.
- Assess a patient’s health literacy using a validated screening tool.
- Compile a prioritized health-related problem list for a patient.
- Evaluate an existing drug therapy regimen.

Establish patient-centered goals and create a care plan for a patient in collaboration with the patient, caregiver(s), and other health professionals that is evidence-based and cost-effective.

Example Supporting Tasks:
- Follow an evidence-based disease management protocol.
- Develop a treatment plan with a patient.
- Manage drug interactions.
- Select monitoring parameters to determine the therapeutic and adverse effects related to the treatment plan.
- Determine the appropriate time interval(s) to collect monitoring data.
- Create a patient-specific education plan.

Implement a care plan in collaboration with the patient, caregivers, and other health professionals.

Example Supporting Tasks:
- Write a note that documents the findings, recommendations, and plan from a patient encounter.
- Educate a patient regarding the appropriate use of a new medication, device to administer a medication, or self-monitoring test.
- Educate a patient on the use of medication adherence aids.
- Assist a patient with behavior change (e.g., use shared decision making and motivational strategies).

Follow-up and monitor a care plan.

Example Supporting Tasks:
- Collect monitoring data at the appropriate time interval(s).
- Evaluate the selected monitoring parameters to determine the therapeutic and adverse effects related to the treatment plan.
- Recommend modifications or adjustments to an existing medication therapy regimen based on patient response.
- Present a patient case to a colleague during a handoff or transition of care.

Interprofessional Team Member Domain:

Collaborate as a member of an interprofessional team.

Example Supporting Tasks:
- Contribute medication-related expertise to the team’s work.
- Explain to a patient, caregiver, or professional colleague each team member’s role and responsibilities.
- Communicate a patient’s medication-related problem(s) to another health professional.
- Use setting appropriate communication skills when interacting with others.
- Use consensus building strategies to develop a shared plan of action.
