

April 21, 2011

The Honorable Dennis R. Rehberg
Chairman
Appropriations Subcommittee on Labor,
Health and Human Services, Education
and Related Agencies
U.S. House of Representatives
Washington, DC 20515

The Honorable Rosa L. DeLauro
Ranking Member
Appropriations Subcommittee on Labor,
Health and Human Services, Education
and Related Agencies
U.S. House of Representatives
Washington, DC 20515

Dear Chairman Rehberg and Ranking Member DeLauro:

The National Center for Health Statistics (NCHS) is the nation's principal health statistics agency. Housed within the Centers for Disease Control and Prevention (CDC), it provides critical data on all aspects of our health care system through data cooperatives and surveys that serve as a gold standard for data collection around the world. The Friends of NCHS endorses the President's FY 2012 request of \$162 million. This funding will build on your previous investments and put the agency on track to become a fully-functioning, 21st Century, national statistical agency.

NCHS collects data on chronic disease prevalence, health care disparities, emergency room use, teen pregnancy, infant mortality, causes of death, and rates of insurance to name a few. These data are used by the Census Bureau in informing its population estimates and projections; by USDA in developing nutrition policies that undergird multibillion dollar federal food assistance programs; by state and local governments and public health officials; by federal policymakers; and by demographers, epidemiologists, health services researchers, and other scientists. The health data collected by NCHS are an essential part of the nation's statistical and public health infrastructure, as demonstrated by the breadth of organizations participating in the Friends of NCHS.

The undersigned organizations greatly appreciate your leadership in securing steady and sustained funding increases for NCHS. Your support has helped NCHS rebuild after years of underinvestment and restore the collection of essential health data. With your continued support, NCHS will modernize its data collection efforts to produce higher quality, more timely data. For example, the President's budget request will allow NCHS to:

- Support all states in collecting consistent, comprehensive birth and death data and implement electronic records to enhance data timeliness and security;

- Expand sample size in surveys such as the National Health Interview Survey, to allow for better state and community estimates about the uninsured, barriers to care, and risk factors across racial and ethnic populations;
- Better monitor obesity rates, especially among children and minority populations, and the performance of preventive interventions, such as nutrition education and fitness programs for youth, through improvements to the National Health and Nutrition Examination Survey.
- Fund new surveys on emerging issues such as health care delivery in assisted living facilities.

As you prepare the FY 2012 Labor-HHS-Education Appropriations bill, we respectfully ask that you provide NCHS with **\$162 million**, consistent with the President's budget request, to strengthen these and other important data collection and quality improvement initiatives. The Friends of NCHS thank you for your ongoing support of health data and look forward to helping you further strengthen the agency.

The Friends of the NCHS is a coalition of over 200 organizations that want to ensure the agency's continued vital role in monitoring our nation's health. For more information on the Friends of NCHS, contact the Emily Holubowich at 202.484.1100 or eholubowich@dc-crd.com.
