

## Appendix E

### Targeted Documentation

Please read the following passage and create a list of possible plans for Nate, the story's main character.

Nate was traveling to the nearest market to buy his friend a bottle of caffeine priced at \$3.95. Once in the store, he discovered he only had a total of \$5.00 in his wallet. Nate became upset because he was also planning on buying his favorite magazine priced at \$4.95. He thought about all of his options (plans of action), remembering that an ATM was only a short drive away. Being frugal, he considered the short drive was worth evading a fee of \$3.00. As Nate decided what to do, he thought, "I want it all..." He got in his MINI-Cooper and drove to the teller.

**Please create a possible option (plan of action) for Nate to ensure he buys everything he wants:**

1. Nate will drive to the teller and obtain enough money to buy the goods he wants.

**Select only ONE of the above plans of action and write an assessment of situation:**

1. Nate current monetary situation does not allow him to buy all the products he desires.

**Provide objective evidence to the above assessment:**

1. Available funds = \$5.00; Necessary funds = \$8.90

**Provide a subjective narrative corresponding to the above objective information, assessment and plan of action:**

1. "I want it all..."

Pull the information above together into a SOAP format:

S: "I want it all..." O: Available funds = \$5.00; Necessary funds = \$8.90. A: Nate's current monetary situation does not allow him to buy all the products he desires. P: Nate will drive to the teller and obtain enough money to buy the goods he wants.
