The AACP institutional research data-gathering and analysis system has been designed to collect and report information related to the U.S. pharmacy colleges and schools including more than 6,600 faculty, 64,300 students enrolled in professional programs, and 6,000 individuals pursuing graduate study. The system can efficiently provide information to characterize the pharmacy education enterprise and its constituents, to study trends, and to assist pharmacy college and school administrators, organizations in higher education, and the government in decision making with regard to pharmacy and health education. For additional information regarding the AACP’s Office of Institutional Research and Effectiveness, contact the Association’s Director of Institutional Research and Effectiveness.
In this report:

- the pharmacy application pool for 2015–16 (i.e., applications for admission in fall 2016);
- degrees conferred data 2015–16 and related long-term trends; and
- student enrollments for fall 2016 and related long-term trends.

In this report:

- **Pharm.D.1** refers to the doctor of pharmacy degree awarded as the first professional degree.
- **Pharm.D.2** refers to a postbaccalaureate degree.
- **First professional degrees** refer to the total of baccalaureates (B.S. in pharmacy, B.Pharm.) plus Pharm.D.1 degrees.
- **White** refers to citizens or permanent residents having origins in any of the original peoples of Europe, the Middle East, or North Africa.
- **Black or African American** refers to U.S citizens or permanent residents having origins in any of the black racial groups of Africa.
- **Hispanic or Latino** refers to U.S. citizens or permanent residents of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin, regardless of race.
- **Asian** refers to U.S. citizens or permanent residents having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian Subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.
- **Native Hawaiian or Other Pacific Islander** refers to U.S. citizens or permanent residents having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands.
- **American Indian or Alaska Native** refers to U.S. citizens or permanent residents having origins in any of the original peoples of North and South America (including Central America) who maintains cultural identification through tribal affiliation or community attachment.
- **Two or more races** refers to U.S. citizens or permanent residents who are not Hispanic/Latino and identify themselves by more than one race.
- **Unknown** refers to U.S. citizens or permanent residents whose race and ethnicity are not known.
- **International/Foreign** refers to citizens of a foreign country/permanent residents of a country other than the U.S.
HIGHLIGHTS

In 2015-16, there were 78,514 applications submitted to first professional degree programs at schools and colleges of pharmacy.

The number of Pharm.D. as a first professional degrees awarded increased to 14,556 in 2016 compared to 13,994 in 2015. This is the largest number of degrees conferred in the history of pharmacy education.

The attrition rate for the class of 2016 was 12.0 percent. The attrition rate includes academic dismissals, student withdrawals, and delayed graduations.

Enrollments in all professional years rose 0.4 percent; however, the number of first professional year enrollments decreased 1.5 percent.

The number of Pharm.D. degrees conferred to individuals already holding a professional baccalaureate in pharmacy increased to 326 in 2016 compared to 273 in 2015. The number of individuals enrolled in postbaccalaureate Pharm.D. programs decreased to 840 from 936 enrolled in fall 2015.

The number of M.S. degrees conferred increased 42.1 percent in 2015-16 and the number of Ph.D. degrees conferred decreased 2.5 percent.

SUMMARY

2015–16 APPLICATION POOL

• From September 2015 through August 2016, one hundred and thirty-seven (137) colleges and schools reported receiving 78,514 applications to the Doctor of Pharmacy (Pharm.D.1) as the first professional degree programs.

• The majority (60.4 percent) of the applications were submitted by females; 38.6 percent were submitted by males. The gender was not reported or unknown for 1.0 percent.

• Underrepresented minorities submitted 19.0 percent of the applications (Black or African American, 12.2 percent; Hispanic or Latino, 6.5 percent; Native Hawaiian or Other Pacific Islander, 0.1 percent; American Indian or Alaska Native, 0.2 percent). 3.1 percent of applications were from applicants that identified as two or more races.

• Over 77 percent (77.2 percent) of the applications to colleges and schools were submitted by individuals who had three or more years of postsecondary education. The breakdown of applications by postsecondary education includes 37.2 percent by applicants that had completed three or more years of postsecondary education without earning a degree; 37.6 percent by applicants that held a baccalaureate; 2.1 percent by applicants that held a master’s degree; and 0.3 percent by applicants that held a doctoral degree.

• The majority (55.0 percent) of applications received by colleges and schools of pharmacy were submitted by out-of-state residents.

PROFESSIONAL (Pharm.D.) DEGREES CONFERRED 2015–16

• The total number of first professional degrees conferred (N=14,556) increased 4.0 percent from 2014-15.

• Women received 61.3 percent of the first professional degrees conferred; men received 38.7 percent.

• White Americans received the majority of Pharm.D.1 degrees (53.2 percent). Underrepresented minorities received 12.2 percent (Black or African American, 7.3 percent; Hispanic or Latino, 4.4 percent; Native Hawaiian or Other Pacific Islander, 0.2 percent; American Indian or Alaska Native, 0.3 percent). Degree recipients that identified as two or more races received 2.2 percent of all Pharm.D.1 degrees. Asian Americans received 24.6 percent of the Pharm.D.1 degrees. The percentage of Pharm.D.1 degree recipients who were foreign, nonpermanent residents of the U.S. was 2.7 percent.

• The number of Pharm.D.2 degrees conferred (n=326) increased by 19.4 percent from 2014-15.

• More women than men received Pharm.D.2 degrees: women, 63.2 percent; men, 36.8 percent.

• The percentage of Pharm.D.2 degree recipients who were foreign, nonpermanent residents of the U.S. was 15.6, down from 17.9 percent in 2014-15.
GRADUATE DEGREES (M.S. and Ph.D.) CONFERRED 2015–16

- The number of M.S. degrees (n=1,023) increased 42.1 percent from 2014-15.
- The number of Ph.D. degrees (n=547) decreased 2.5 percent from 2014-15.
- More women than men earned M.S. degrees (women, 59.8 percent; men, 40.2 percent) in 2015-16; however, more men earned Ph.D. degrees (women, 45.7 percent; men, 54.3 percent). There have only been two years since AACP began collecting data (2008-09 and 2012-13) in which women earned more Ph.D. degrees than men.
- Underrepresented minorities received 12.3 percent of the M.S. degrees (Black or African American, 6.6 percent; Hispanic or Latino, 5.0 percent; Native Hawaiian or Other Pacific Islander, 0.4 percent; American Indian or Alaska Native, 0.3 percent), up from 6.7 percent in 2014-15. Degree recipients that identified as two or more races received 1.6 percent of all M.S. degrees and Asian Americans received 10.7 percent of the M.S. degrees. The percentage of M.S. degree recipients who were foreign, nonpermanent residents of the U.S. was 35.3 percent, down from 48.8 percent in 2014-15.
- By discipline, the most M.S. degrees conferred were in social and administrative sciences (27.0 percent). The next highest percentage was in pharmaceutics (24.8 percent), followed by medicinal chemistry (19.8 percent), pharmacy practice (12.9 percent), pharmacology (12.0 percent), and other discipline (3.4 percent).

FALL 2016 ENROLLMENTS

- 63,464 students were enrolled in the Doctor of Pharmacy (Pharm.D.1) as the first professional degree programs.
- There was a 0.4 percent increase from fall 2015 in enrollments in the professional years (includes four years for Pharm.D.) of the Pharm.D.1 degree program.
- Underrepresented minorities accounted for 14.4 percent of Pharm.D.1 degree enrollments (Black or African American, 8.4 percent; Hispanic or Latino, 5.3 percent; Native Hawaiian or Other Pacific Islander, 0.4 percent; American Indian or Alaska Native, 0.3 percent) in fall 2016. Students that identified as two or more races accounted for 2.4 percent of all first professional degree enrollments.
- The number of Pharm.D.2 students enrolled (n=840) decreased by 10.3 percent from fall 2015.
- There were 59 students enrolled in traditional full-time Pharm.D.2 degree programs in fall 2016. There were an additional 781 students enrolled in nontraditional programs in fall 2016.
- At the M.S. and Ph.D. levels the greatest numbers of full-time students were enrolled in the discipline of pharmaceutics (36.3 percent and 36.6 percent, respectively).
- More females than males were enrolled full-time in M.S. programs, while more males than females were enrolled full-time in Ph.D. programs. Females accounted for 60.7 percent of full-time students in M.S. programs and 48.1 percent of full-time students in Ph.D. programs.
- The percentage of full-time M.S. students who were underrepresented minorities (Black or African American, 4.0 percent; Hispanic or Latino, 3.3 percent; Native Hawaiian or Other Pacific Islander, 0.2 percent; American Indian or Alaska Native, 0.1 percent) decreased from 8.2 percent in fall 2015 to 7.6 percent in fall 2016. 2.3 percent of all M.S. full-time enrollments were students that identified as two or more races.
- The percentage of full-time Ph.D. students who were underrepresented minorities (Black or African American, 3.9 percent; Hispanic or Latino, 2.9 percent; Native Hawaiian or Other Pacific Islander, 0.1 percent; American Indian or Alaska Native, 0.3 percent) increased from 6.6 percent in fall 2015 to 7.2 percent in fall 2016. 1.1 percent of all Ph.D. full-time enrollments were students that identified as two or more races.
