## About the AACP Curriculum Quality Surveys

The Graduating Student, Alumni, Preceptor, and Faculty surveys were first released in 2007. These surveys were based on the Accreditation Council of Pharmacy Education’s (ACPE) 2007 Standards with the intention of gathering continuous improvement data for the colleges and schools of pharmacy.

In spring 2015, the AACP Institutional Research and Assessment Committee (IRAC), AACP staff, and ACPE staff revised these curriculum quality perception surveys to accommodate changes with the release of ACPE’s 2016 Standards. In 2019, IRAC decided to move the demographic questions on three of the curriculum quality surveys (Graduating Student, Preceptor, and Alumni) to the end of the survey instrument. The Faculty demographic question section was already at the end of the survey instrument. The 2020 results reflect the fifth administration of these revised surveys and second administration of the renumbered Graduating Student, Preceptor, and Alumni surveys.

## 2020 Administration

The Faculty Survey was made available for online access in the AACP Survey System on March 2, 2020. As of July 2020, 91 out of 144 (63.2%) colleges and schools of pharmacy administered the survey to their faculty. A total of three thousand, eight hundred and seventy-five (3,875) faculty were invited to complete the survey. Three thousand, one hundred and nine (3,109) faculty submitted the survey for a total response rate of 80.2 percent (80.2%). Response rates per school ranged from 44.7 percent to 100 percent. For more information regarding this summary report or the administration of the survey, please contact the Office of Institutional Research and Effectiveness ([data@aacp.org](mailto:data@aacp.org)).

### Section I: Administration and Governance

Overall, both administrative and non-administrative faculty had similar opinions regarding administration and governance. However, questions 3 and 4 had the **largest difference** between the answers of non-administrators and administrators. Questions 5 and 7 had the **most similar** amount of agreement under Section I.

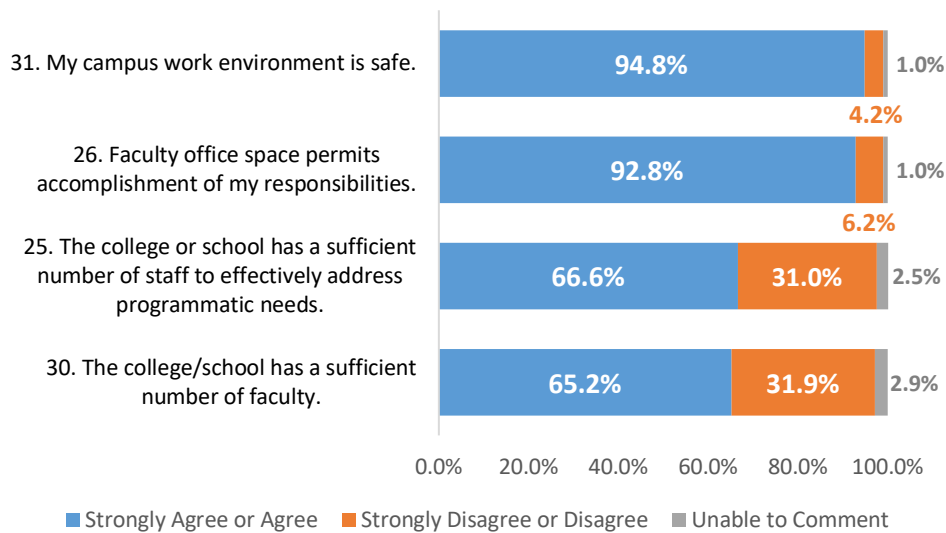

\*Non-Administrators include respondents who answered No Administrative Rank. Administrators include respondents who answered: Dean, Associate Dean, Assistant Dean, Department Head/Chair, or Other. Other responses were only included if they indicated a clear administrative rank. Blank responses, or Other responses that did not indicate clear administrative rank were excluded from these calculations. After these exclusions, there were 2,839 total faculty respondents used in the calculations.

In 2020, over 80 percent of all faculty (80.3%) strongly agreed or agreed that their college or school’s dean was an effective leader. Nearly 68 percent of all faculty (67.9%) strongly agreed or agreed that they were given the opportunity to provide evaluative feedback of the administrators. Over 95 percent of all faculty (95.4%) strongly agreed or agreed that they were aware that their college/school had policies for dealing with harassment and discrimination.

Over 80 percent (80.2%) of faculty strongly agreed or agreed that administrators function as a unified team, an increase from responses in 2019 (76.6%). Nearly 82 percent (81.9%) strongly agreed or agreed that administrators were aware of their needs/problems; however, there was slightly less agreement that these administrators were responsive to these need/problems (75.6% strongly agreed or agreed that administrators were responsive to these needs/problems).

**Section III: College/School Infrastructure**

A majority of faculty strongly agreed or agreed that their campus work environment was safe and that their faculty office space permits accomplishment of their responsibilities. The largest proportion of disagreement was in response to the college/school having a sufficient number of faculty and staff.

**Section V: Developing and Supervising Students**

Over ninety percent (90.6%) of faculty strongly agreed or agreed that the college/school provides an environment and culture that promote professional behavior among students, faculty, administrators, preceptors and staff. Eighty-three percent (83.0%) strongly agreed or agreed that the college/school has an effective process to manage poor academic performance of students, an increase from 2019 (78.7%).
